## Chemistry Curriculum Progression Map

School Purpose: To nurture curiosity every day, for every child, within a community acting as a beacon of the Catholic faith
Pupils should be taught to:

|  | Everyday materials | Uses of everyday materials | States of matter | Properties and change of materials | Rocks |
| :---: | :---: | :---: | :---: | :---: | :---: |
| Year 1 | distinguish between an object and the material from which it is made <br> identify and name a variety of everyday materials, including wood, plastic, glass, metal, water, and rock <br> describe the simple physical properties of a variety of everyday materials <br> compare and group together a variety of everyday materials on the basis of their simple physical properties. |  |  |  |  |
| Year 2 |  | identify and compare the suitability of a variety of everyday materials, including wood, metal, plastic, glass, brick, rock, paper and cardboard for particular uses <br> find out how the shapes of solid objects made from some materials can be changed by squashing, bending, twisting and stretching. |  |  |  |
| Year 3 |  |  | compare and group together different kinds of rocks on the basis of their appearance and simple physical properties |  |  |

\(\left.$$
\begin{array}{|l|l|l|l|l|l|}\hline & & & \begin{array}{l}\text { describe in simple terms how } \\
\text { fossils are formed when things } \\
\text { that have lived are trapped } \\
\text { within rock }\end{array} & \\
\hline \text { Year 4 } & & & \begin{array}{l}\text { recognise that soils are made } \\
\text { from rocks and organic matter. }\end{array} & \begin{array}{l}\text { compare and group materials } \\
\text { together, according to whether } \\
\text { they are solids, liquids or gases }\end{array}
$$ <br>
observe that some materials <br>
change state when they are <br>
heated or cooled, and measure <br>
or research the temperature at <br>
which this happens in degrees <br>

Celsius ({ }^{\circ} C)\end{array}\right]\)| identify the part played by |
| :--- |
| ind |
|  |

|  |  |  |  |  |
| :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- | :--- |
| give reasons, based on evidence |  |  |  |  |
| from comparative and fair tests, |  |  |  |  |
| for the particular uses of |  |  |  |  |
| everyday materials, including |  |  |  |  |
| metals, wood and plastic |  |  |  |  |
| demonstrate that dissolving, |  |  |  |  |
| mixing and changes of state are |  |  |  |  |
| reversible changes |  |  |  |  |
| explain that some changes result |  |  |  |  |
| in the formation of new |  |  |  |  |
| materials, and that this kind of |  |  |  |  |
| change is not usually reversible, |  |  |  |  |
| including changes associated |  |  |  |  |
| with burning and the action of |  |  |  |  |
| acid on bicarbonate of soda. |  |  |  |  |
